Shivam Tiwari

AI/ML Engineer | Full-Stack & GenAI Systems

Email: shivamtiwari28189@gmail.com | Phone: +91 7065273202 | GitHub | LinkedIn | Portfolio

Who am I

AI/ML Engineer who ships end-to-end intelligent systems, not just models - production ML pipelines, LLM-powered apps, RAG and multi-modal architectures, and web-scraped, training-ready datasets. I own what I build, from data to deployment, and execute fast, often ahead of deadlines.

Education

Maharaja Agrasen Institute of Technology, Delhi *2023 – 2027*
Bachelor of Technology (B.Tech) in Information Technology

Experience

Full Stack AI Intern — Superkalam (YC S23) *Jul – Aug 2027*
AI-Powered Personalized Mentoring Platform for UPSC Aspirants

- Worked on **Homi**, an AI mentoring product — refactored **7,000+ NCERT solutions** and restructured the dataset into a clean, queryable schema, enabling the AI system to accurately answer student queries in real time.

Founding Software Engineer - MicroKahani Pvt Ltd *Nov 2025*
Short-Form Video Platform — Web + Mobile Website App

- Built and optimized an AI-powered OTT micro-drama platform for Digital Kalakaar Production, serving 15M+ followers and 200M+ monthly views, with analytics-driven content optimization and user behavior tracking.
- Designed and deployed an **AI-powered video recommendation engine** using collaborative filtering and content-based embeddings to personalize the video feed, boosting session watch-time and repeat engagement.
- Led and managed a development team to build the platform, coordinating backend, mobile, ML, and infrastructure.

Full stack AI Intern — The Bookshelves *Jun 2025*

- Led and collaborated with the development team to design and build backend services for a student-driven startup.
- Built an **AI-powered Smart Book Management & Allotment System** — used computer vision/OCR to scan and catalog books automatically, and an ML-driven allocation engine to auto-assign and allot books to students based on availability and demand.
- Developed peer-to-peer engagement features and coordinated product demonstrations with the team.

Products

CodeSpirit Website App
Event & Hackathon SaaS Platform — Web + Mobile App

- Built scalable multi-role platform for events, hackathons, QR check-ins, social profiles, and real-time chat; architected for **1M+ concurrent users**.
- Built an **AI-powered team matching & opportunity recommendation engine** pairing students with compatible teammates and surfacing relevant hackathons via skill-embedding similarity.
- Designed full system — backend, mobile app, web dashboard; scaled the platform to **1000+ active users**.
- **Tech:** React.js, TypeScript, React Native, Expo CLI, Node.js, Express.js, Socket.io, MongoDB, Redis, JWT, Razorpay, Azure, FCM, SMTP, Nodecron, Nodemailer.

ExpertKaro Expertkaro App
Expert Consultation Platform — Web + Mobile App

- Developed multi-role platform connecting users with doctors, mentors via real-time chat and audio call.
- Built an **AI-powered mentor-user matching system** for intelligent 1:1 pairing, plus an AI guidance layer over the chat/call flow that assists with query triage and contextual response suggestions.
- Implemented profile verification, role-based access control, Cashfree payments, and wallet.
- **Tech:** React Native, TypeScript, Node.js, JWT, FCM, Cashfree, Redis, MongoDB, Azure, ImageKit

AccessWay – AI-Powered Accessibility Assistant for People with Disabilities AccessWay

- Built AI-powered smart glasses enabling visually impaired users to navigate independently via voice assistance, real-time object detection, scene analysis, and LLM-based emergency assistance.
- **Tech:** Flutter, Dart, FastAPI, LLMs, Python, AI/ML, Computer Vision, Firebase, MongoDB, Google Maps API

Technologies & Skills

AI / ML Frameworks: TensorFlow, PyTorch, Keras, Scikit-learn, LightGBM, OpenCV, Hugging Face, spaCy, NLTK, YOLO, MediaPipe
GenAI & LLMs: LangChain, LlamaIndex, OpenAI API, Claude API, RAG, Multi-Modal AI (CLIP, LLaVA, Whisper), Prompt Engineering, AI Agents, Fine-Tuning
Vector & Data Stores: Pinecone, ChromaDB, MongoDB, PostgreSQL, MySQL, Redis
Data Science: NumPy, Pandas, Matplotlib, Seaborn, Plotly, Jupyter, Statistical Modeling, Feature Engineering
Web Scraping & Data Pipelines: BeautifulSoup, Scrapy, Selenium, Playwright, Requests, lxml, Puppeteer, Regex, Large-Scale Extraction & Cleaning
AI-Assisted Dev Tools: Claude, GitHub Copilot, Cursor, Google Antigravity
Languages: Python, JavaScript, TypeScript, C++, C, Java, SQL, HTML, CSS
Frontend: React.js, React Native, Expo CLI, Flutter, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design, UI/UX
Backend & Auth: Node.js, Express.js, Go, Java Spring Boot, .NET, REST APIs, GraphQL, Microservices, JWT, OAuth, Razorpay, Cashfree
Cloud, DevOps & Soft Skills: Azure, AWS, GCP, Vercel, Git, Docker, System Design; Leadership, Team Management, Communication
